Error – Username / Password Incorrect If the user is logging through a difference phone number as the screenshot and the system		✓
Getting Schemes Failed – An error occurred while trying to fetch the policy limits	✓	
Claim Creat Failed – Claim Amount Less Than 0	✓	

Considering points before you submit the inquiry to IT Department.

Not getting proper information from the team

1. As the first step check the member's existence in the system.
2. Have a proper idea about the errors and why the error is occurring.
3. Please check and make sure the app is up to date
4. First must-know issue (OTP issue, login issue, Claim create fail issue, etc.)
5. Request a screenshot of the error
6. If an error raise when creating a claim must request details of the claim (bill dates, person who apply the claim, and amount)
7. Mobile device name and model
8. Contact number, emp number, and company
9. Selected scheme if needed
10. When You're sending a new issue please don't use existing mail thread

Adding requirements

Considering points before you submit the requirements to IT Department.

1. Check whether the task is a bug, issue, or a new requirement.
2. The new requirements shouldn't go to the support JIRA board, IT support members, developers, or any other person without informing the Product Manager.
3. If it is a new requirement, it should be in a proper document within your department heads approval thread and it should be sent to the Product Manager as an email with its priority.
4. Tasks will be taken to the development according to the prioritization and the availability of the developers, or IT support team.

Adding the issues, bugs for JIRA platform

Considering points before you submit the inquiry to IT Department via email.

1. Check whether the task really needs IT support.
2. Check all the points mentioned on 3, 4 and 5 slides.
3. If the support is really needed, please send an email including all the details related to the issue and please add the email address jira@digis-digitalservices.atlassian.net along with the relevant IT team members.

WhatsApp messages on support tasks

Considering points before you send the support tasks to IT Department via WhatsApp.

1. Check whether the task is a bug, issue, or a new requirement.
2. Please consider the points on 3rd slide.
3. Make sure to add the **reference number and the priority** of the task.
4. Tasks will not be taken even if one of the above is missing
5. After sending the message to WhatsApp, we will create a ticket for the task in the JIRA with the reference number.

THANK YOU!
